

This App will require a text (.txt) file to create the summary based on how many percent you want to summarize the text.

For this to work you have to import the text file to the app by the following methods:

1. Create a text file from a PDF
2. Create a text file from a Word Document (.docx)
3. Or if you already have the text file, select it

After that, you will:

1. Select the Language of the text and apply
2. Select the percentage of the summary and apply
3. Summarize
4. Save the summarized text

If you want to repeat the process for another document, you have to clear all fields by clicking on the "Clear" button.
